## CAREER OVERVIEW

Enthusiastic Web Developer with a knack for creating dynamic and interactive websites. With a strong foundation in both frontend and backend technologies, I am eager to leverage my skills to drive innovation in a collaborative team setting. My attention to detail and commitment to coding best practices enable me to deliver highquality results in every project

---

## SKILLS

- Languages: Core Java
  - Databases: MySQL, MongoDB
  - Web Technologies: HTML, CSS, Node.js, Express.js, JavaScript, Reactjs, MERN stack
  - Tools : VS Code, Eclipse, NetBeans, familiar with git
- 

## EDUCATION

### B.sc Computer Science

Govt. Holkar Science College,  
Indore M.P.| 2022-present

### Higher Secondary Examination (Math)

Govt Ahilya Ashram girls H.S-1, Indore  
M.P.

- In 2022 With 89.2%
- 

## TRAINING

### MPIF gurukul associated with InfoBeans Foundation

- Undergoing hands-on training focused on real-world software development practices.
- Working on backend development, API structuring, and team-oriented project implementation.
- Gaining exposure to industry-level coding standards and practical use of technologies like Node.js, Express, MySQL,

## PROJECT

### DMart Billing Console Application (Java)

- A Java-based billing system for DMarket that simulates Items purchases, applies discounts and calculates addition charges GST and carry bag fees.

### Online Electricity Bill Management System(Java)

- Created a GUI-based desktop application for managing electricity billing operations.
- Admin could assign unique meter numbers to users, while users could register, view and pay bills.
- Used Java Swing for UI, JDBC for database operations, and Ant for project building.

### Fun-Fact website (HTML, CSS,Bootstrap)

- Developed a static informational website with category-based navigation and zoom effects on cards.
- Created custom pages like Categories, Our Story, and Videos with external video embedding.
- Focused on clean UI/UX using Bootstrap cards, image hover effects, and responsive layouts.
- Understood layout structuring, class-based CSS, and interactive components.

### E-commerce App (Mini Project) Node.js, Express.js, MySQL, JavaScript, Bootstrap

- Developed a functional e-commerce backend with product listings, cart management, and a simulated payment system.
  - Designed APIs to view all products, add to cart, and view cart items on a separate page.
  - Implemented a dynamic UI with card view, quantity selectors, and total price calculation using JavaScript
  - Focused on modular Express structure, efficient routing, and clean database queries with MySQL..
-
